

Widening Horizons

Each Learning Pathway has at least one **engaging** learning adventure outside of school.

Film It!

Our dedicated film studio will be in constant use with each learning theme having a specified 'Film It' focus. Our 'Film It' programme provides an **engaging** opportunity to develop speech and language and communication skills whilst also creating a real **purpose** for learning.

THE LIMES
PRIMARY ACADEMY

Stunning Start

Each learning theme starts with an engagement activity. This could, for example, be an educational visit, a themed day or a visitor linked to the learning theme, to **engage** and immerse children in the learning.

Lines of Enquiry

A fertile question and initial posed problem will begin debate, open lines of enquiry and give **purpose** to the learning theme.

Learning Map with Key Milestones

Each theme has a learning journey mapped out, with skills and knowledge to be explored and developed en route. However, we are never afraid of a child-led 'detour' – following children's interests is vital for **engagement**.

World of Work

Aspirations are key to learning. As part of raising aspirations and understanding the purpose behind learning, each theme will have a focus on the world of work. Role play in EYFS and KS1 and a more 'vocational' approach in KS2 allows children to become 'experts' in a field and build aspiration for the future whilst applying their learning from the theme.

Destination

Each learning theme ends with a 'destination': a fabulous finish, celebrating and sharing the learning throughout the theme. The destination is shared with the children from the start of the learning journey, providing a **purposeful** hook for learning throughout the theme.

The possibilities are endless and the children's **pride** in their learning shines through.
